

New England States Committee on Electricity

November 22, 2011 - The New England States Committee on Electricity (NESCOE), New England's Regional State Committee, has retained the services of La Capra Associates following a competitive solicitation for proposals from persons with engineering experience to provide technical consulting services.

La Capra Associates will provide assistance to NESCOE in targeted areas within system planning and expansion, such as, for example, alternative resource analysis. La Capra's power system engineering expertise will enhance NESCOE's capacity to advance policies in New England that will provide electricity at the lowest possible price over the long-term, consistent with maintaining reliable service and environmental quality.
